

Work with your neighbor. (This will be graded for participation only.)

---

For this ICA, we will be doing the Exercises in the Python review slides from slide 48 through slide 97.

You can submit using either of these methods:

- Enter your answers in a .doc file, create a PDF, and upload your PDF to Gradescope.
- If you want to use the whiteboards or paper, simply take photos with your phone and upload the photos. (You can load several photos for the ICA, but drag them into Gradescope all at once.)
- Be sure to include the Word of the Day in your submission!
