

Lab 11 Resource Document: Redo Submission

Next week, submissions will open for a redo assignment, allowing you to get points back on an earlier long project. To do this, all the late folders for previous long problems will be reopened.

There are two steps:

1. Upload your updated code to the late folder for the long problem you redid.
2. Upload a `redo.txt` file to the 'Assignment-Redo-Opportunity' folder with your name and the assignment you redid:

Name: Student Name

Assignment: 6

Some notes:

- You can only submit one redo assignment, and it only applies to the long problem.
- If your grade is higher on the redo, it replaces your original grade on that problem.
- You can redo an assignment even if you did not originally submit for that assignment.
